DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted. The groups and the claims they include are as follows:

Group I, claim(s) 91-104 are drawn to a wound healing plasma composition comprising a sheet like porous body having at least leukocytes on the surface and/or platelets.

Group II, claim(s) 105-120, drawn to a method of preparing a wound-healing composition comprising a step of trapping leukocytes and/or platelets in a sheet-like porous body.

Group III, claim(s) 121-130 are drawn to a device for preparing a wound-healing promoting material with a sheet-like porous body.

Group IV, claim(s) 131-136, are drawn to a method of treating a wound site with the composition of claim 91.

(a) An international or national stage application shall relate to one invention only or to a group of inventions so linked as to form a single general inventive concept. Where a group of inventions is claimed in an application, the requirement of unity of invention shall be fulfilled only when there is a technical relationship among those invention involving one or more of the same or corresponding special technical features. The expression "special technical features" shall mean those technical features that define a contribution which each of the **CLAIMED INVENTIONS, CONSIDERED AS A WHOLE, MAKES OVER THE PRIOR ART**.

The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because the invention AS CLAIMED is known in the art, see (Cochrum et al. U.S. Patent # 5,510,102) and thus no special technical feature unites these inventions in a category.

Art Unit: 1651

The special technical feature of a wound healing promoting material which has a sheet-like porous body can has at least leukocytes and/or platelets is taught by Cochrum et al. in Examples 6-16.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
